Don't buy. Just don't.. Not only isn't it a simulator, I still haven't seen any negative consequences to pinning the throttle to max for the whole journey, but it's actually a not-completely-horrible little time management thing. Open the doors at the station, close them when everyone's on, push the throttle to max, go collect tickets, then park the train at the next station. Once you earn enough money you can unlock faster trains. It's not a good game, but man, I see you guys out there playing much, much worse than this just because it has 5000 cheevos. This cost me three bucks in the bundle deal, and my thumbs up is for a decent three buck game you can play competently while drunk or half asleep..
